STATEMENT: See report.

RECOMMENDATION: _____

INSPECTOR FINDINGS:

On February 8, 1991 at 1:35 P.M., I arrived at **Woodmill Products**, 1551 E. Orangethorpe, Fullerton CA 92631, pursuant to a complaint investigation.

Before proceeding to the alleged source, I park my car at the complainant's address where I did not detect any odors. I also did not observe any sawdust particles on the complainant's parking lot or the parking lot adjacent to the alleged source

At Woodmill Products, I met with **Mr. David Soto**, Manager (714) 870-9050, who accompanied me during my investigation. I told Mr. Soto I have received an odor complaint and the complainant is alleging that varnish odor is coming from his plant. I also told him the complainant also mentioned something about sawdust particles coming from his plant. Mr. Soto

said he just joined the company about two weeks ago and it would be helpful for him to know what is going on.

Mr. Soto said the company manufactures wooden novelty items and picture frames. He said the company has a paint line and a bag house.

During my inspection, I observed that the bag house area is well maintained. I did not see any mounds of sawdust and all the sawdust particles are collected into a closed trash bin. In the spray room I observed that the spray line is not operating. Mr. Soto said the paint line is only used during the morning shift. He said his maintenance people usually ~~do~~ the maintenance work on the paint line afterburner and clean the paint room during the second shift.

I have also observed that the company is using Rule 1136 compliant equipments and coatings. Records are well maintained and an application for change of ownership had been submitted to the District.

I left Woodmill Products at 3:30 P.M.

On February 11, 1991, I called the complainant, **PRVY-Controlled/Privacy** and inform him about the result of my investigation.

Disposition: Alleged source is Operating Not Violating. Disposition called in to the radio room on 02/08/91 at 3:30 P.M.
